

TUFWAY

“ A unique combination of durability & comfort is why operators & end users have made Tufway the most used restroom in the world. ”

Portable restrooms save 125,000,000 gallons of water every day.

By design, the Tufway interior is built for user comfort. It has a spacious, well-ventilated interior to reduce odors due to simple, yet important features. The seat is positioned at the furthest point from the urinal, away from odor and user's direct sight. Together, these features produce a more comfortable, pleasant experience for the end user.

Worry-Free Design

Operationally, the Tufway is a low-maintenance, easy-to-service restroom with a long history of durability. Using fewer parts and made from high-density polyethylene, the Tufway can withstand impact and abusive handling without cracking or breaking. The features which make the Tufway easy to clean and service are the front sloping tank top, slightly domed floor and smooth, deep sumped tank. Adding slope to the tank and floor surface forces liquids to drain, not puddle, and the sumped tank improves deodorizer coverage and assures quick, complete waste removal.

The seat and urinal are positioned far apart to improve the experience of the end user

Available with a powerful, recirculating foot flush

Large, 70 gallon sumped tank is easy to clean and hides waste

Wide, molded in vents provide superior ventilation.

reviews

“...after 25 years in the industry, I can say that the Tufway remains our strongest, most attractive and versatile product we’ve ever bought.”
